(54) Title: METHOD OF CONSTRUCTING A PILE FOUNDATION

(57) Abstract: A method of constructing a pile foundation, wherein a foundation structure (1) is built on the ground (2), and has at least one though hole (4), and a connecting member (5) fixed to the foundation structure (1), adjacent to the hole (4), and having at least one portion (7) projecting upwards; a pile (3) is inserted through the hole (4); and a number of thrusts are applied statistically on the pile (3), to drive the pile (3) into the ground (2), by means of a thrust device (21), which is located over the pile (3), cooperates with a top end (22) of the pile (3), and is connected to the projecting portion (7) of the connecting member (5) which, when driving the pile, acts as a reaction member for the thrust device (21).
